Company Overview

Founded in 1992, Davis is dedicated to the research, design, production, sales, and service of intelligent outdoor shading products. As one of the earliest enterprises engaged in outdoor shading products in China, the company boasts extensive industry experience and consistently adheres to providing high-quality, high-standard products to serve global customers.

Business Scope

The company specializes in intelligent outdoor shading products, including retractable awnings, pergolas, aluminum roof roller blinds, windproof roller blinds, and more. These products are widely used in villas, balconies, commercial spaces, and garden architectures. With continuous innovation, the company offers professional customized solutions to create comfortable outdoor living spaces for customers.

Global Market

Davis products are popular both domestically and internationally, with services covering multiple countries and regions, earning recognition and trust from global customers. Major export markets include developed regions such as the United States, Europe, and the Middle East.

Core Values

Integrity as the foundation, customer-first, people-oriented, and continuous innovation.

Development Philosophy

- Continuously focus on superior products to provide customers with high-quality services.
- Optimize communication channels, integrate resources, and enhance sales performance.
- Build a streamlined and efficient team to concentrate on producing exceptional products.

Corporate Vision

As a leader in outdoor living spaces, Davis is committed to driving industry development, using innovative technology to create smarter, more eco-friendly, and comfortable outdoor shading solutions. We welcome global customers and partners to join us in building a brighter future together!

Company Strengths

 National high-tech enterprises	 30,000 m ² 30,000 m ² manufacturing base	 32 YEARS Coverage in 30 provinces and cities	 Export business to 70+ countries
 3,000 m ² 3,000 m ² showroom	 5,000+ 5,000+ completed projects	 50+ R&D team members	 200+ national patents
